

INFESTING ANIMALS INFORMATION:

In compliance with the laws in force concerning the control of flying, crawling and rodent animals control, we inform the kind customers present in the area belonging to the Camping Class that the control thresholds will be kept due to public safety.

Being the structure located in the area "Park delta del Po" it is clear that there is an intense variety of flora and fauna. The area is already administered and controlled by competent regional and provincial bodies represented by forest rangers (*Forestale*) and *carabinieri* corps.

Procedures for the removal of bloodsucking insects and all those that are considered harmful and harassing such as wasps, tiger mosquitoes, hornets, snakes, rodents, scorpions and all the haematophagi in general related to the presence of pets within the structure, we will take them into consideration. Everything necessary will be carried out from the point of view of risk prevention and abatement treatments on the entire perimeter of the area concerned. The intervention procedure is called "anti-intrusion" and is accepted and desired by the competent body of Ausl and supported by the Ministry of National Health. The active ingredients used are P.M.C. (medical surgeons) of free sale approved by the Ministry of Health.

We hereby inform you that in case you have phobias or allergic forms to the products used (P.M.C.) you must inform the management on the day of arrival.

Camping Class exempts itself from any responsibility regarding facts or circumstances that are not strictly related to the above.
